WATER

LIVING PRAISE CHAPEL

WATER

We all need water so we can live. We use water so we can cook, water to bath, water to build, water to manufacture things, water to help our cars, planes and ships. In everything that we do we need water.

I would like us to look at the area of humans : Any food that we eat has some amount of water.

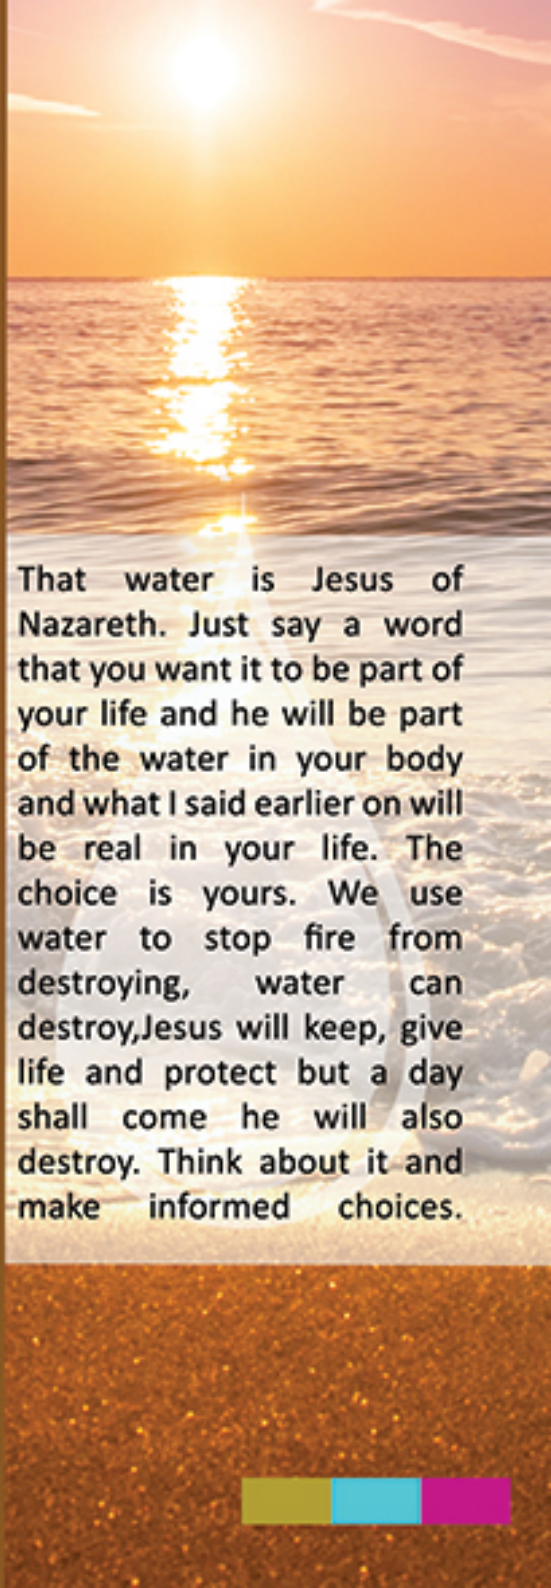

WATER IS ESSENTIAL IN OUR SURVIVAL ON THIS EARTH. OUR VERY BODY CONTAINS 75% OF WATER. ANYTHING SHORT OF THAT, AND WE ARE IN TROUBLE. ANY LIVING THING NEEDS SOME AMOUNT OF WATER.

The air we breath has some amount of water in it. This water will not let us live forever, even though we need to have it so we can live.

I would like to introduce you to a particular water that when you have it, breath it, drink it and when you are dying that water will make you live on. The creator of the universe knew that we will spoil the water that we have. In fact the water that we have around us will not help us to live on forever.

So he, the Creator, has provided alternative water which you can't see, but when you drink it and breathe it, you will live on forever. It has now been made known unto us. Do you want to live on? Even when your body has given up and all seems to fade away, and life seems meaningless, that water will bring a refreshing, that water is available where you are. If you have it, it will refresh you life here on earth and after.

That water is Jesus of Nazareth. Just say a word that you want it to be part of your life and he will be part of the water in your body and what I said earlier on will be real in your life. The choice is yours. We use water to stop fire from destroying, water can destroy, Jesus will keep, give life and protect but a day shall come he will also destroy. Think about it and make informed choices.
