

The Bible teaches that there are two kingdoms: the Kingdom of God and the kingdom of darkness. Jesus Christ emphasized the Kingdom of God, not merely the cross or His resurrection, but the path to eternal life with the Father. Just as our parents prepared a place for us before we were born, so too is a place being prepared for us in eternity.

The question remains: where will you migrate when your time on Earth is over? Life is not just about existing but about fulfilling the will of the One who placed us here. The choice is ours to make, and that choice determines our final destination.

If you seek understanding, pray for God's guidance and seek a church that will help you prepare for the Kingdom of God. Jesus is the door and the way—just as our mothers were the gateway for our entrance into this world, He is the gateway to eternal life with the Father.

May you make the right choice in this journey of life.

THE PURPOSE OF MIGRATION

PURPOSE OF MIGRATION

Dear Reader,

From time immemorial, humans have migrated from place to place. Migration can be either voluntary or involuntary. Today, when we hear the word "migration," we often think of people moving from foreign lands, speaking different languages. However, migration is an intrinsic part of human history—whether in our own lifetimes or through our ancestors.

Migration has become a major topic of discussion in nations and communities, yet it has always been a natural part of existence, for both humans and animals. Animals migrate in search of food, to reproduce, to protect their young, or to escape unfavorable climates. Fish travel across oceans and rivers for survival. Even plants migrate, with pollen carried by the wind to take root in new locations.

The Reasons for Migration

Throughout life, we migrate for various reasons—education, work, marriage, and personal needs. Migration is often driven by necessity. A child is conceived due to the desire of one or both parents. People move for better opportunities, housing, or healthcare.

At its best, migration fosters joy, acceptance, and fulfillment. It allows people to experience new opportunities and enrich different cultures. However, migration can also bring challenges. Some people resist change, whether at the personal, societal, or national level. Families may struggle with accommodating relatives, communities may reject outsiders, and nations may enact strict immigration policies. While governments have the right to regulate migration, misunderstandings arise when policies are not clearly explained.

Migration affects schools, hospitals, food supplies, and the environment, and these factors must be considered when discussing its impact.

When handled well, migration promotes unity, trade, technological exchange, and the sharing of knowledge in fields such as medicine and agriculture. It has made the world more interconnected than ever before.

Legal and Spiritual Migration

From a legal perspective, undocumented migration is restricted by most nations. Similarly, in a spiritual sense, there are boundaries set by our Creator. Just as a country enforces laws for its citizens, God has established principles for humanity. Through Jesus Christ, we are given guidance on how to live according to His will.

Migration in Faith and Life

Many people move from church to church in search of spiritual fulfillment. While this is a personal decision, it should be approached with wisdom and discernment.

Marriage also often requires migration. Most people do not marry childhood acquaintances but instead move to new places to build a life with their spouse. Likewise, people migrate for health reasons, personal growth, or the pursuit of a better life.

The Ultimate Migration: Our Journey Beyond Life

There is another form of migration—one that is unseen but significant: the migration of our souls. Just as we were once formed in the womb and brought into this world, one day we will depart from it. However, the destination of that migration is not left to chance; it is shaped by the choices we make on Earth.
